**DEMO
KIT**

Test, Configure, Optimize!

Our demo kit cases contain advanced illuminators with different parameters and light colors, allowing precise adjustment of lighting to your vision application.

THE SET INCLUDES:

- Various types of LED illuminators (dome light, ring, linear, etc.)
- Optical filters to eliminate reflections and improve image contrast
- A complete set of cables and accessories for easy connection
- A power bank ensuring independence from external power sources

WITH THE DEMO KIT, YOU CAN:

- Test different lighting configurations without additional investments
- Minimize time and costs of vision system integration
- Evaluate image quality in real production conditions
- Customize the solution to your specific needs
- Make a one-time purchase with multiple applications and flexible configuration!
